

Retraction Note: Vitamin D supplementation during pregnancy inhibits the activation of fetal membrane NF- κ B pathway

N. GURKAN

Department of Obstetrics and Gynecology, Medical Park Hospital, Samsun, Turkey

The article “Vitamin D supplementation during pregnancy inhibits the activation of fetal membrane NF- κ B pathway, by N. Gurkan, published in Eur Rev Med Pharmacol Sci 2022; 26 (16): 5926-5931–10.26355/eurrev_202208_29532–PMID: 36066168” has been retracted by the author as she stated that Vitamin D was used in the study as supplement and not a drug without the permission of the Ministry. Although Vitamin D is a commonly used supplement during pregnancy, the Local Ethics Committee accepted it as a drug and asked for it to be approved by the Ministry of Health. Therefore, the manuscript has been withdrawn.

After publication, the authors applied a correction to the Funding statement: “This Project was supported by the Scientific Research Projects Coordination Unit at Hatay Mustafa Kemal University. Project Number: 18. M. 088.”

The Publisher apologizes for any inconvenience this may cause.
